

A scatter plot showing the relationship between Height and a variable represented by blue circles. The x-axis is labeled 'Height' and ranges from 5.2 to 6.0. The y-axis is unlabeled. A vertical dotted line is drawn at Height = 5.5. The data points are clustered at the bottom of the plot, indicating a constant value for the y-axis variable across the range of heights.

A scatter plot showing the relationship between Height (cm) on the x-axis and Weight (kg) on the y-axis. The x-axis ranges from 5.0 to 6.0 with major ticks every 0.2 units. The y-axis ranges from 0 to 100 with major ticks every 20 units. A vertical dotted line is drawn at Height = 5.5. The data points, represented by open circles, are concentrated in a horizontal band between Weight 0 and 20, spanning from Height approximately 5.35 to 5.65. There are very few data points above Weight 20.
