

A scatter plot showing the relationship between Height (x-axis) and an unlabeled y-axis. The x-axis ranges from 5.2 to 6.0 with major ticks every 0.2 units. A vertical dotted line is drawn at Height = 5.5. The data points, represented by blue circles, are clustered at the bottom of the plot, indicating low values for the y-variable across the range of heights.

A scatter plot showing the distribution of Height (x-axis) and a vertical dotted line at Height = 5.5. The x-axis is labeled 'Height' and ranges from 5.0 to 6.0 with major ticks every 0.2 units. The data points are represented by open circles, clustered between 5.4 and 5.6, with a peak density around 5.5. A vertical dotted line is drawn at Height = 5.5, extending from the x-axis to the top of the plot area.
